NARRATIVE DESCRIPTION OF PROJECT: Trout Unlimited (TU) is working with the land and water right owners, Marcus and Charlee Menzel, to change the place and purpose of use of this water right for local flow improvement. TU intends to transfer this right to instream flow under the State Trust Water Right Program (POU -- Manastash Creek), beginning at the historical points of diversion to the confluence of the Yakima River and Manastash Creek. This transfer is not for mitigation and, as such, is a primary reach change only. This project is TWSA-neutral because the landowner will not increase acreage and will continue irrigating using Kittitas Reclamation District (KRD) water. The landowner understands the new irrigation amount is limited to the acreage assessed by KRD. We provide the consumptive use amounts as an illustration that the annual KRD delivery (5 AF/acre for 2017) is sufficient to meet the irrigation needs and this project will not result in any consumptive use increase for the Yakima Basin.
