NARRATIVE DESCRIPTION OF PROJECT:

This is a change application to transfer a portion of S4-83378-J to irrigate five (5) acres immediately adjacent of the original place of use. There is no proposed change to the existing point of diversion located at within the SW ¼ of the SE ¼ of Sec. 4, T. 15 N., R. 15 E.W.M. The applicant's property does not currently have water rights. This change will allow the applicant to irrigate a portion, five (5) acres of his 6.91 acre parcel. The water will be utilized for the propagation of Pasture or Alfalfa (similar to crops currently grown at the original place of use). This change will result in the fallowing of 5 acres from Yakima County Parcel No. 15163433002. There is no regulator history for S4-83378-J not being fulfilled.

CONSUMPTIVE USE CALCULATION:

No change to the consumptive use of the water right is expected as a result of this proposed change. The point of diversion (where Rattlesnake Ditch is diverted from Rattlesnake Creek) will remain unchanged and applicant will access water from the Rattlesnake Ditch near where it is accessed currently. The proposed combined use under the proposed change [thirteen (13) acres at the original place of use and five (5) acres at the proposed place of use] is the same in extent to the total current use [eighteen (18) acres at the original place of use] for irrigating similar crops. The proposed place of use parcel is immediately adjacent to the current place of use parcel.
