From April 15 through July 10: 25% of the natural flow of Ahtanum Creek as measured at the north and south gauging stations. If the natural flow exceeds 51.8 cubic feet per second (north-side users are permitted to divert 38.839 cfs which is equal to 75% of the 51.8 cfs), all the excess over that figure is awarded to the United States as trustee for the Yakama Nation and Allottees for Trust and Tribal fee lands, to the extent water can be put to a beneficial use. The 38.839 cfs is subject to further reductions due to reversions by north-side parties.

This water right is a portion of the proratable 25% of the Ahtanum Creek natural flow that is available from April 15 through July 10 for use on lands within the Yakama Reservation.

All waters not used on north side parcels with valid water rights shall become available for use on the reservation lands. The United States may divert and store the entirety of Ahtanum Creek subject to water rights allocated to users located north of Ahtanum Creek and the Nation's instream flow right.

From July 11 to March 31st: All waters of Ahtanum Creek not used to support fish and other aquatic life shall be available to, and subject to diversion and storage by the United States, Bureau of Indian Affairs, as trustee for the Yakama Nation and Allottees.

The above diversion and storage rights to irrigation and stock water shall be in addition to and junior to the Yakama Nation's Treaty water right for fish and other aquatic life as recognized in previous orders of the Court.

This water right is a federally reserved right and is not subject to state regulation, law or oversight.

This entry point is approximately 1,350 feet westerly of the east quarter corner of Section 4, T. 12 N., R. 19 E.W.M. At this point, the water flows into the Reclamation/CPM wetland enhancement and creation project area, where a portion of the water was used for creation of 32.23 acres of wetland. Limitations Of Use: The authorized total water use is limited to 300 cfs as a minimum and 450 cfs as a maximum, or as otherwise shaped by the United States Bureau of Reclamation, when naturally available in the river, under this right and the rights confirmed for diversions from the Naches River into the Wapatox Canal by the Wapatox Ditch Company, Thomas E. and Delores I. Vernier, James H. and Nona P. Nichols, Charles R. and Peggy L. Harris, Carl W. and Alice H. Van Wechel, Richard J. Ringer, Willis F. and Joy D. Thomson. When flows are available and senior rights would not be impacted, the United States Bureau of Reclamation may continue to utilize flows greater than the maximum of 450 cfs under the PacifiCorp limiting agreement. All water diverted and not used for irrigation by other uses on the canal shall be returned to the Naches River not lower than the tailrace for the Naches Power Canal.

During water years when rights junior to May 10, 1905, **are**

curtailed, the total annual withdrawal among water right changes CG4-CCV1-4P278 and CS4-00135CTCL, Permits G4-30371P and G4-30398P, for the purpose of use of dairy operation shall not exceed 413 acre-feet, **plus** the prorated quantity of water identified in the following table that would have been available at the original place of use from April 1 to the day of curtailment, but not to exceed 617 feet. This provisions does not apply if evidence is provided consistent with **Order Limiting Post-1905 Diversion** that the diversion of water herein will not limit or diminish the water available for diversion by a more senior water right.

Additional Quantity of Water Available for Diversion
Each Day Until the Date of Curtailment.⁽¹⁾

<u>Month</u>	
April	0.19 acre-foot per day
May	1.44 acre-feet per day
June	1.83 acre-feet per day
July	2.23 acre-feet per day
August	1.81 acre-feet per day
